That was when I began to think about turning back.

Then sleet began and, as all aviators know, in a sleet storm on may be forced down in a very few minutes. It got worse and worse. There, above and below me and on both sides, was that driving storm. I made several detours trying to get out of it, but in vain. flew as low as ten feet above the water and then mounted to 10,000 feet. Along towards morning the storm eased off and I came down to a comparatively low level.

I had seen one ship just before leaving sight of Newfoundlan and I saw the glow of several others through the mist and storm. During the day I saw no ships until near Ireland.

I had, as I said, no trouble before I hit this storm. We had taken off at 7:52 in the morning. The field was slightly damp and soft, so the take off was longer than would have been otherwise. I had no trouble getting over the houses and trees. Soon after starting I was out of sight of land for 300 miles from Cape Cod over the sea to Nova Scotia. My motor was acting perfectly and was carrying well the load of 451 gallons of gasoline and twenty gallons of oil which gave my ship the greatest cruising radius

I passed over St. John's, purposely going out of my way a few miles to check up. I went right through the narrow pass, going down low so that it could be definitely established where I was at Mrs. Lindbergh had refused to make that hour. That was the last place I saw before taking to the

The French people are certainly wonderful and we must apreciate what they have sone.

In as much as one place would have been about as good or as bad as another.

Despite talk about my periscope I had no trouble with regard to visibility. The view I had on both sides was quite good enough for navigating the ocean and the purpose of the periscope was never other than to be able to see any obstacle directly in front of me. The periscope was useful in starting from New York and landing in Paris. Other than that I used it very little. I kept a map in front of me and an instrument showing practically where I was all the time.

New York, May 22.—[Special.]—An unusually large chest expansion and nearly double perfect vision, as compared with the eyesight of normal persons, are two of the outstanding physical characteristics of Capt. Charles A. Lindbergh.

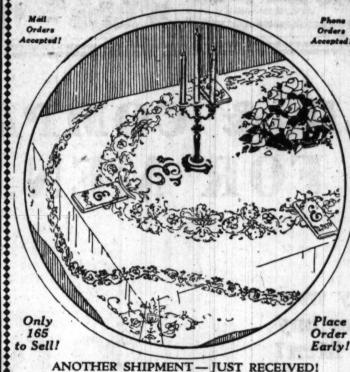

So Dr. David Stoddard Dooman, who is health commissioner of Garden City and a visiting sugeon at St. Mark's hospital, said Lindbergh's chest expansion was five and three quarters inches, an inch and three quarters more than the normal chest expansion of puglists. The flyer's vision, the physician said, was found to be 25-15 in both eyes, normal perfect vision being rated as 15-15.

THE THREE JUDGES.

The politicians who left three of the sitting judges off their coalition acket are now seeking to prevent the three from running independently. A petition has been filed with the county clerk alleging that the nominating petition of the three judges is irregular in that it was not filed with the secretary of state at Springfield as well as with the county clerk.

Lawyers familiar with the election statutes have stated that the objection is without weight. Whether that is true or not, it must be apparent "Our Country! Summer Furniture Will Bring Comfort, Color and Coolness to Your Home

The largest stock of woven and rustic furniture we have ever had is displayed in a newly arranged room that is arched and trellised and vine-covered until it looks much like a garden. Peel cane, reed, fiber, willow, sea" grass and rustic furniture becomes increasingly popular. It fills a definite need in the furnishing of porches and sun rooms, and for garden or lawn. It is light and easily moved about, it gives an impression of coolness, and it may easily be a valuable unit in a color scheme. The new styles carry gay colors, and there are many novel shapes and weaves.

From a Northern Michigan island comes this unique rustic furniture. Every piece is entirely hand made, and the natural charm of the woods is thus retained. For country houses and gardens this furniture is quite the most appealing of its kind. There are many pieces other than those shown in the sketch . . . The Settee is \$29.50. The three-tiered Table in the corner is \$17.50. Above it is the Hanging Book Shelf, at \$12.50. The Wood Basket on the hearth, one of the most charming pieces, is \$12.75. The Chair is \$15.75, and the neat little stool, \$5.50.

The Sensational \$25,000 New York-Paris Flight Just Completed Was Accomplished with the Cooling Method which the Franklin Pioneered, Perfected, and Alone Can Offer to Motorists Today.

New York to Paris, without a stop, by airplane! At last the dream of all aviators has been realized. And in this, as in Byrd's and Cobham's epochal flights, air-cooling played an important, even an essential, part.

Cobham flew from London to Capetown and back, over the world's longest stretches of torrid desert and jungle. Byrd conquered 1600 miles of arctic wastes and zero temperatures to the North Pole and back. And now man triumphs over 3600 miles of ocean. And all three planes employed the cooling system which only Franklin offers on land!

Could there be more conclusive proof that aircooling is the system of the future-that all other methods are rapidly becoming out of date? Could

there be any more timely or forceful reason for you to find out fully and finally what the Franklin offers to you?

Air-cooling kills all cooling work, worry and expense. But that is only one of Franklin's big adcontages. Franklin performance throughout aston-ishes even those who believe they know utmost notor car luxury.

Just as outstanding as air-cooling, and based on principles just as advanced, are its famous comfeet, its amazingly easy handling, its unrivaled speed over the road, its high economy, its minimum

What those principles and features are, makes one of the most interesting collections of facts you ever heard. Come in and hear it-get acquainted with Franklin's outstanding style and unvarying high quality—and then let us give you a trial drive and demonstration. It will be the motoring dis-covery of your life!

Announcing the Opening of OUR SUMMER DRESS SEASON

Imported Flowered Chiffons — Crepes Elizabeth and Georgette Tailored Crepe Satins - Organdies - Plain Chiffons with Lace

For Mademoiselle-Short sleeve effects are the summer vogue for The

Younger Set. Picture them in Bouffant Organdies, in the new Tailored Pastel Crepe Satins, in Silk Crepes of delectables hues like Wood Violet, Sistine Blue, Ibis - or in Pastel Chiffons topped with Ecru Lace! Both long and short sleeved Frocks are exquisite, Mademoiselle, in Chiffons inserted with Valenciennes. And our new Imported Flowered Chiffons are glorious for summer days! Summer Fracks, \$25 to \$95.

For Madame _ Tailored Simplicity marks the summer vogue for Madame. The flared skirt and the non-chalant side-tie Vionnet neckline are new. But they, like other details, are subordinated to simplicity. Flowered Chiffons and Sheer Pastel Silk Crepes are important. Our Tailored Silk Frocks are charming in Posey Green, Nude, Ibis, Black, White. Madame's especial attention is also called to a group of Dinner Frocks of Imported Flowered Chiffons new! Summer Frocks, \$25 to \$95.

Wants to know how far the cab-bonding law goes

> The State cabbonding law is an admirable thing as far as it goes: But how far does it go-what measure of protection does it afford the public?

> According to laws of Illinois, every public cab is bonded for \$2,500.00 to "guarantee responsibility." To what extent can \$2,500.00 guarantee responsibility? Wouldn't it be ridiculous if railroads, elevated lines, busses and street cars were to limit their responsibility to \$2,500.00.

> Why should taxicabs be limited in liability any more than these? Their mission is the same—they are all engaged in the business of public transportation.

As a matter of fact this whole matter simmers down to actual, not theoretical, responsibility. The \$2,500.00 bond is merely a gesture or more or less a false motion. While it is intended to allay public apprehension, it falls far short of its object. It is good as far as it goes, but it doesn't go anywhere.

You should think of these facts when you call a cab and entrust your wives, your children and yourselves to a cab-driver. And you should know that Yellow Cab is the one cab company in Chicago whose financial responsibility is established far and away beyond the bond.

So, that, the question "Whom are you riding with?" becomes at once pertinent, significant and highly important to the people of Chicago.

WHY is this car being run in an ice box?

VERY DAY and every night-summer and winter—a General Motors car is being tested in this big ice box in the General Motors Research Laboratories.

The temperature can be lowered to 30 degrees below zero. Ease of starting, acceleration, gas consumption, richness of mixture, oil dilution-every factor of winter driving can be tested out at every degree of temperature. The records are checked by General Motors research engineers who send them back to the engineering staffs at the various plants.

This is but one of many ways in which General Motors is using its resources to increase the value of its cars. And you may buy any General Motors car with assurance that next winter it will make your driving easier and more satisfactory.

EASTERN HORSES ARE UNLOADED AT WASHINGTON PK.

May Race in Aurora Stake Events.

BY FRENCH LANE.

Eastern turfmen began their Chicago invasion yesterday when a train load of thoroughbreds traveling in seven Palace Express cars arrived from Maryland and was unloaded at Washington Park.

While most of these horses are intended for racing at Washington Park, Lincoln Fields and Hawthorne during June, July and August, a number of them will fill engagements in stake events at Aurora during the closing days of the spring season, which winds up one week from tomorrow.

Arriving from the famous old Pimlico track were H. G. Bedwell with 23 horses, Woods Garth with 15. E. K. Bryson with 15, Sam Holman with 15, the Woodlawn stable with 7, W. J. Howard with 6, J. J. Meyers with 6, the Bell Farm stable with 5, an

In another shipment from the east, due to arrive today, will be 15 horses belonging to R. T. Wilson, president of the Saratoga Racing association, and more than a dozen belonging to W. J. Fairman.

W. J. Fairman. Cheap Horses Moving On.

The coming of the eastern horses and the possibility of their filling engagements at Aurora during the last eight days of the season should add much interest to the windup of the meeting in the Fox River valley.

The cheap horses, which, due to severe weather and track conditions, have furnished most of the Aurora racing, already are beginning to scatter to many different points. Many of them are going to Omaha, others to the Maple Heights course in Ohio, and a number have departed for Fairmount. This has made it necessary for Racing Secretary Henry to build his program for the closing days for the better grade of horses.

\$3,000 Handicap at Aurora.

The \$3,000 Memorial Day handicap at a mile and a sixteenth, to be run one week from today, should attract the best field ever to go to the post, at Aurora. The handicap horses that have arrived from the east and Kentucky will be vanned over to clash in this race with the handicap performers that have been racing at Au-

The best Monday card of the season is offered at Aurora today, with a six furlong event engaging a fairly good band of sprinters, holding the place of honor.

MICHIGAN CUTS ILLINOIS' LEAD IN BASEBALL RACE

University of Illinois baseball team, conference leader for the last month, found Big Ten competition more rugged last week and today holds only half a game margin over the two second place teams, Michigan and Minnesota.

Though Illinois split even in games last week, Michigan clipped off three victories, stretching the team's string of consecutive victories to five. The pitching of Don Miller and Asbeck has been mainly responsible for the Wolverines' spurt.

Lindbergh uses Gargoyle Mobiloil
in thrilling airplane leap across the Atlantic
from New York to Paris

ONCE more we thrill to the accomplishment of an American aviator.

In one great leap of 3,600 miles, Captain Charles Lindbergh—alone—crossed the Atlantic from New York to Paris in a few hours. This flight followed his recordbreaking flight from San Diego to New York.

In this epoch-making flight, Gargoyle Mobiloil "B" was used to lubricate the single Wright Whirlwind engine of the Ryan plane, "The Spirit of St. Louis."

Thus another great adventure is written into the vivid history of American aviation in which Mobiloil has played its part.

When Commander Byrd flew to the North Pole—he used Mobiloil "B". When the U. S. Army fliers flew around the world in 1924—they used Mobil-

When Lieutenant Maughan in 1924 flew across the United States "from dawn-to-dusk"—he used Mobiloil "B".

When Captain Lindbergh flew from San Diego to New York—he used Mobiloil "B".

And now—when Captain Lindbergh flies from New York to Payis—he uses Mobiloil "B".

Lubrication was a vital factor in this spectacular flight across the open ocean as it was in the previous epoch-making flights. There could be no mistake. The single Wright engine must function perfectly. The slightest mishap meant instant danger, perhaps the end of the flight in the waters of the Atlantic.

The entire lubrication problem of the Ryan plane was placed in the hands of the Vacuum Oil Company. Mobiloil "B" was prescribed. After careful preparation the great attempt was made.

Correct Lubrication did its part. The flight is a success. The ocean has been crossed. The longest non-stop flight in history has been made.

The Gargoyle Mobiloil Engineers are constantly and directly associated with aeronautic developments just as they have been associated with automobile developments from the beginning. As lubrication experts, we prescribe the correct oil for the newest development in aircraft engines just as we prescribe the correct oil for the car you drive.

The oil used in this flight was not a special oil. It was the same Gargoyle Mobiloil "B" which, with the other grades of Mobiloil, is on sale by good dealers everywhere.

Put scientific lubrication to work in your car. Mobiloil proves not only the safest oil to use but the most economical lubrication per mile and per year.

LINDBERGH Lands in Paris on Goodrich Silvertowns

ILVERTOWNS across the sea! Landing on the dependable resilience of Silvertown Airplane Tires, Capt. Charles E. Lindbergh in his Ryan monoplane "Spirit of St. Louis" won his fight with death and distance. The stalwart cushioning of Silvertowns absorbed the landing shock of the first airship to fly from New York to Paris without a stop.

Silvertowns started Lindbergh safely on his way past the dangerous, critical seconds of the take-off at New York.

Silvertowns delivered him safe at Paris—safe from the fateful impact as his eagle plane swooped from the sky, and slammed its wheels down on Europe.

The first thirty seconds of the flight—the last thirty seconds of it!

The first 1,000 feet on the ground after Lindbergh cried "Okay" and they jerked the chuck blocks away from the Silvertown-shod wheels! The last 1000 feet as the great mono-

plane hurtled across the Paris landing field.

These were seconds of held breath and tense nerves. Would the tires stand up as the 5,150 pounds of the loaded plane hammered and battered them along the runway? Would they hold the 46-foot wingspread of the eagle ship true to the course?

Would a tire fail in those seconds of grave stress? A blowout spelled the end of the magnificent venture, perhaps with a still greater adventure for the man in the cockpit. Less than a minute of time, yet an eternity of suspense, the overseas plane thundered along the gauntlet of disaster.

Silvertowns held! Their sinewy strength, their sturdy cushioning stood the stress and strain that had doomed a thousand flights. Capt. Lindbergh soared away safe and landed safe.

Silvertowns met the test as they met it when this unheralded challenger. Capt. Lindbergh, started on his flight from San Diego to New York and made it in less than twenty-three hours.

The dash through the clouds to Paris was a matter of gasoline, courage of the intrepid voyager of the skies-and Silvertown tires in the taking off over here and the landing over there.

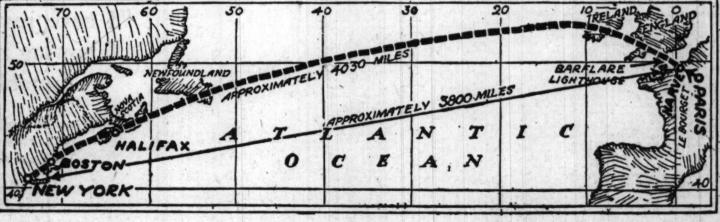

The "Spirit of St. Louis" sped overseas a perfectly equipped airplane, instruments and

parts the nearest to perfection ever assembled.

Captain Charles Lindbergh built it quietly at San Diego, counting on its mechanical perfection as well as his skill and courage to carry through to the goal.

And when it came to tires he fortified the security of his plane with Silvertowns. He underwrote the safety of his venture with the tires that have through years met the test of great moments of competition.

He called to his aid the same flexing strength, the same dependable endurance with which Goodrich Silvertowns have for years served the motor cars of the world.

Married to a Jazz

Addict, He Longs

for Girl He Scorned

"A year ago I married a girl whose popularity was the talk of the crowd. She was a consummate liar I have found out since, and nothing but a con-tinuous night life suits her. We have a tinuous night life suits her. We have a tiny baby daughter and it drives me crazy to see the mother nursing her with a cigaret dangling from the corner of her mouth. If I say anything to her she throws up to me about the other girl whom I wish to God I had married, as I can't stand the pretense and hypocrisy of the girl I had made my wife. HARRY."

An interesting slant on the psychology of some males, is it not? Not a particularly new one, lowever. I am not moved to sympathy over Harry's personal plight. But as it affects that tiny victim who had no say in the choice of parents, it is a heart-rending tragedy unless those parents get together and work out some solution for her benefit. In spite of Harry's contradictory taste in women, there is enough good in a man stirred to resentment about an unsavory influence (ver his child to make me feel he could yet build something decent out of his marriage if he would go at it in the right way Not by dangling his own mistake before his wife's eyes can anything constructive be done, but by admit-ting that being a parent calls for responsibility toward the child, and try-ing to persuade the mother of the infant to see things in a similar light.

Hectoring the woman never will do it, nor crying aloud for the things that might have been. It is going to take consummate patience to rectifys mistake of Harry's kind, if it can b done. Anyway, it is worth the try-ing, for that small infant's sake.

What woman who knows Castile has not longed for a Castile with the modern touch, a dainty, generously lathering feminine toilet soap with all the matchless virtue of old Castile? And here it is; Doña Castile, the loveliest of all beauty soaps today.

You will find Doña Castile infinitely bland and soothing to your skin, be it ever so delicate! For of course there is nothing like olive oil to softly cleanse a woman's skin!

This is the secret of Castile! To it we have added the modern virtues of a beauty soap. Generous lather, a delicious shape ("hardmilled," so it will last), a charming fresh package. And though Doña is more costly to make than the finest imported Castile, it comes to and Don-ra you for ten cents—because so many million women use it!

Bach Chorus of 250 Voices Thrills Elmer

Repeat Concert of Three Cantatas Given Over WLS

BY ELMER DOUGLASS.

The Chicago Bach chorus of 250 voices enthralled WLS listeners from 7 to 7:50 o'clock last night. The three ch cantatas recently given in their Orchestra hall concert, were repeated nd with the same soloists, Anna Bur-nelster, soprano; Louise Harrison lade, contralto; Mark Love, bass; Beuan Taylor Porter at the piano, and William Boeppler directing.

The concert was a magnificent ex-ression of the marvelous works of oresalon of the marves of has composed 297 cantatas.

The cantatas. "God, the Lord, Is a Sun and Shield," from instrumental prelude and the succeeding rapidly alternating bass and also solos and chorus responses, was in tone and treatment quite in the familiar Handel style, except the final "Amen" chorus in Bach style, which for devoional sublimity would seem unsur-
